Subject: LRC-Small-Systems

To whom it may concern!

We herewith confirm the usage of Ing.M.Schwarz GmbH's filling- and overflow prevention system within our distribution and fleet activities.

BP Austria carries out deliveries to private households, commercial and industrial costumers with an own fleet and own drivers. Part of the own fleet is equipped with LRC-Small-system, which proved to be user friendly, highly reliable and favorable in procuring and which we can fully recommend.

Customer orientation and responsiveness together with a high quality delivery service is key for our activities; no accidents, no harm to people and no damage to the environment is our policy; only top equipment helps to reach these goals!

Best regards,

Ernst F.Kikinger
Manager Logistics
